

**TOWN OF EASTON
ENGINEERING DEPARTMENT**

P.O. Box 520
Easton, Maryland 21601

DATE: April 5, 2018
FROM: Katie Reedy
SUBJECT: Town of Easton Spring 2018 Paving Project

Contractor Russell's Paving Company is scheduled to start the annual paving project the week of April 9, 2018. A map of the sections of Town roads to be paved is attached.

Each section of road as highlighted on the map, in orange, will be worked on for approximately three to five partial non-consecutive days. It is our intention to keep roads open, with traffic control measures in place while work is ongoing. If we need to close roads for safety concerns, detours will be put in place and emergency services notified.

We expect the work to progress in the following manner:

- Mill existing asphalt
- Pave Streets
- Reinstall permanent pavement markings

On street parking will not be available prior to work starting for the day and will be reopened shortly after each day's work on that road section has completed. All town parking lots will remain accessible throughout the project.

We anticipate all work to be complete on or before May 31, 2018, as always weather conditions can affect the amount of time in which this project is completed.

Any questions or concerns should be addressed to the Town Engineer's office at 410-820-8822 or engineering@eastonmd.gov.

Thank you for your help in making this a successful project.

Katie S. Reedy
